ProductFitter

Industry
Publishing, Creativity, Graphics.

The Customer
A data visualization software company.

The Challenge
The challenge included converting graphics in high resolution dots per inch (HiDPI) to various formats in the cloud and developing a simple to manage api for storing and updating graphical files.

Tool's Advantages

PORTABILITY

The application is usable on web-accessbile devices.

Conversion
The application converted to numerous popular high resolution image formats.

Collaborative, instant access
Moving from single user desktop architecture to a cloud-based collaborative architecture.

Flexibility
The application is extendable and scalable using api's to communicate between client side and server side.

An app for converting graphics to various formats
Including PDF, PNG Print-Quality conversion and user access control.

Solution Overview

The purpose of the project:
The system enables its target audience to store and convert vector graphics. Serving as a back-end to our client's client side application, it enabled our client to quickly move a desktop based publishing solution into the cloud.

Business Benefits
- High-resolution publishing from the cloud;
- User management;
- Flexible architecture.

Scope of Service
- Requirements collection;
- Business Analysis;
- Architecture development;
- User Interface design & Development;
- Application Development;
- Product Support;
- Product Documentation;
- QA & Testing.

Technology Tools

php   Objective-C   android   yii framework   MySQL   JavaScript
